

Product Sheet

Induction Cleaner

Midas Induction Cleaner is a concentrated detergent designed to penetrate and dissolve harmful deposits found on intake valves and combustion chambers. Exhaust emissions can be lowered and driveability improved through deposit removal. **Midas Induction Cleaner** uses an alcohol-free formula and can be used in any fuel-injected gasoline engine.

Application / Directions

For best results, engine should be at normal operating temperature.
Eye protection should be worn.

- Pour **Midas Induction Cleaner** into a **Induction Tool**.
- Connect the tip of the outlet hose to the ported vacuum source as close to the throttle body as possible.
- Run engine from idle to 1500 RPM and set meter valve to empty bottle in approximately eight to ten minutes.
- After product has been completely evacuated, shut off engine.
- Reconnect vacuum hose. Let vehicle sit approximately five to ten minutes.
- Drive vehicle for a few minutes to remove any residue

Features / Benefits

- Removes gum and varnish from intake valves.
- Decarbonizes intake valves and combustion chambers.
- Helps lower exhaust emissions.
- Alcohol-free.
- Will not harm catalytic converters, seals or oxygen sensors.
