

Product Sheet

Oil System Cleaner

Midas Oil System Cleaner is a dispersant-based cleaning solution that removes accumulated deposits from various oil systems on a vehicle. When used in an engine prior to an oil change, this product removes deposits from lifters, rings, rocker arms and other internal components.

Application / Directions

- Make sure oil is at proper level and engine is at operating temperature.
- Before performing an oil-and-filter change,
- Add **Oil System Cleaner** to crankcase.
- Let car run at idle for 5-10 minutes.
- Do not rev engine or drive car.
- Drain oil and perform an oil-and-filter change according to manufacturer's recommendations.

Features / Benefits

- Contains an anti-friction additive to help prevent dry starts.
- Helps remove harmful deposits and contaminants.
- Helps clean valve lifters, ring lands and rocker arms.
- Helps reduce engine blow-by.
- Improves fluid circulation.
